Operating instructions

When using smokeless fuel remember to burn only anthracite or manufactured smokeless fuel briquettes. Never use bituminous coal or petroleum based fuels, these types of fuels will invalidate the product guarantee. The lighting is highly recommended to be made with kindling.

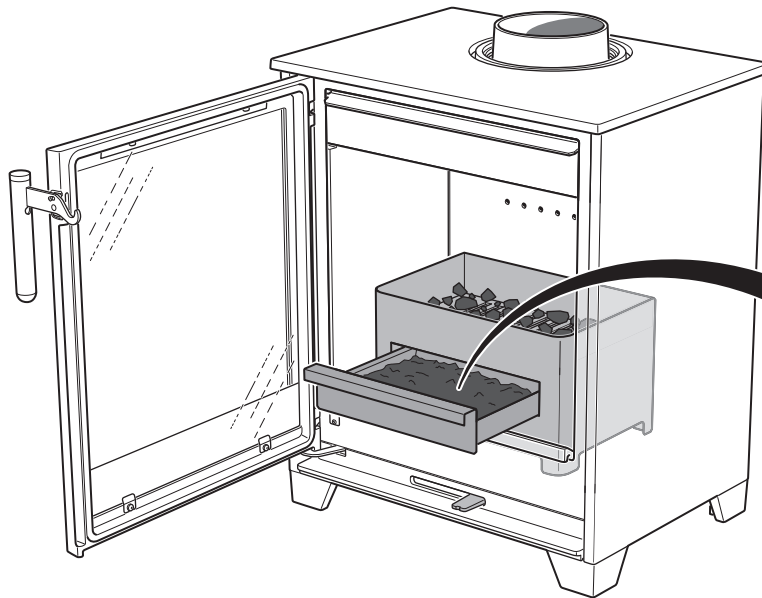

3

Add briquettes on top of the glowing embers, about 0,6-0,7 kg and close the door.

4

De-ash before refueling with 0,6-1,0 kg briquettes, refuel little and often for clean and efficient burning.
