

Contura

A warm
welcome home

Contura

There is nothing cosier than a real fire.

Anyone who lives where there is an autumn, winter and spring knows this. But the heat from a fire is not just a cosiness factor that triggers deep feelings of safety and community. It is also a sensible and modern solution that maximises both your and nature's resources.

A stove from Contura will spread warmth and cosiness in your home.

Therefore you should choose carefully. We make Contura for those who appreciate good design, intelligent functions and a wide choice. We make stoves for those who choose with the heart and the head.

It is quite simply, quality of life.

Comfort with a clear conscience

Heating your home with firewood saves you money and helps the environment too. Modern, efficient combustion technology reduces emissions of particulate matter and all the carbon dioxide that is produced is reabsorbed by new trees as they grow. Contura stoves are among the most efficient in the world with emission levels below Swedish and international limits.

Considering the environment in everything we do

Contura is constantly developing combustion technologies and designs to improve heat output. The efficiency of the combustion shows that a modern Contura converts most of the calorific value of the wood into heat. This means that very little smoke is emitted since the energy is used to generate heat in the room instead of hot smoke that is released outside.

Good circulation for efficient combustion

With a closed combustion system, combustion air is led to the stove through ducts from the chimney, external wall or floor. This ensures optimal, stable combustion that does not affect the ventilation of the building.

Less firewood

Did you know that a modern stove uses 50% less firewood, and reduces emissions by 90%? Turn to page 184 to find out more about efficient combustion.

Energy labelling

The European Union's Energy Labelling Directive establishes a framework to reduce adverse environmental impacts of energy-related products and helps you choose the most energy-efficient products. Woodburners in the A energy efficiency category offer high efficiency and thus low running costs. This is what Contura means by comfort with a clear conscience, both today and in the future.

Contura Values

Timeless design created for your lifestyle

Homes come in many styles and sizes. It's good to know that you'll always find something in our range with design and features that last a lifetime. Contura has a stove that suits your style, whoever you are.

The purest fire of world-class heating the natural way

You can light up your stove with a clear conscience, knowing that you are being kind to the environment and your wallet. Contura stoves are CO₂ neutral, using efficient combustion technology for excellent heating economy and minimal emissions.

The peace of mind that comes with Swedish quality

Contura stoves are Made in Sweden, in the most state-of-the-art stove manufacturing facilities in the world, with a focus on reduced environmental impact, respect for human rights, good business ethics and high quality standards at every stage of production.

Quality of life and comfort

Superior quality is a hallmark of Contura throughout its entire life, from production of a stove to its installation — and all the years it fills your home with light and heat. At Contura, we're proud of our tradition of innovative design and technology. The soul that we incorporate into all of our stoves stands for quality, assurance and home comfort.

Timeless design and a warm look

"There are lots of things that create comfort in a home. First and foremost ourselves of course, then everything that we like and enjoy. But the cherry on top is the stove. It has to be big and hot!"

Read more about Contura 690G Style on page 75.

Relaxing in every way

"There is nothing better than relaxing together. Preferably beside the stove. The side glass allow the fire to be seen even more and is, quite simply, more relaxing."

Read more about Contura 556G Style on page 59.

Majestic!

"We just love our stove! We love the majestic statement it makes in the room, opening the senses and awakening the emotions."

Read more about Contura 886G Style on page 87.

Proper logs for a proper fire

"We like having fires with big logs and we looked for a stove that met our needs, without taking up too much space."

Read more about Contura 330G on page 52.

A modern take on tradition

"The Artstone surround gives a soft impression which we fell for. The combination of stone, glass and flames is beautiful. Age old materials in a completely modern format."

Read more about Contura 610AG Style on page 71.

More space for warmth

The firebox in the Contura 800 Style has been given an innovative new design to further boost the heat output. For added safety and convenience, the door is self-closing, but with the option of keeping it open during cleaning for example.

Read more about Contura 856T Style on page 84.

A painting we never get tired of

The cassette in our new chimney breast is like a brilliant and vivid painting. It is high up, so that the fire can be seen throughout the room. We never get tired of it, it is just as good after the fire has gone out and we sleep soundly in the lingering heat from the chimney breast.

Read more about Contura i4 Modern on page 114.

Heart of the home

The fireplace becomes the natural centrepiece of the room and creates a sense of harmony that warms both body and soul.

Read more about Contura i8G on page 120.

A tangible difference

Our stove insert really makes a difference to the heating, so we light a fire nearly every day. With the large glass, it was perfect for our functioning stove. A lot of people think that it has always been there.

Read more about Contura i5 on page 116.

Build in with variation

The i7 allows you to customise your fireplace exactly as you want it. Place it inside a fireplace that you design yourself.

Read more about Contura i7G on page 119.

Design to make time stand still

Timeless Scandinavian elegance to thrill and amaze. The Contura i61 is ideal for both contemporary and traditional interiors. The design is based on our popular i50 range, but has been updated to give it a sleeker, more compact format.

Read more about Contura i61A on page 136.

Here we have settled

– for a more relaxed life, where time can be taken for each activity. Such as enjoying a wonderful, warming fire for example.

Read more about Contura i51 on page 130.

Light with the environment in mind

Everything we do has an impact on the environment in some way. Today, we often have the opportunity to influence to what extent. One way to contribute to a reduced environmental impact when choosing a stove is to select a high-efficiency, modern clean-burning appliance with the latest combustion technology.

At Contura, we place stringent requirements on our manufacturing processes. This means our products can be recycled without the spread of toxic substances.

The requirements for efficient combustion are also high. It is during combustion that unhealthy particulates and hydrocarbons are formed. Contura stoves have a combustion efficiency that puts them below the permitted limits, provided that you light properly. Learn more about how to light effectively and with most efficiency at **www.contura.eu**. It is the best for you and the environment.

A wood burning stove is CO₂ neutral, because the carbon dioxide produced during the efficient combustion of bioenergy is taken up in the corresponding quantity as new trees are growing.

By lighting, you get a natural supporting heat in the house, which relieves the load on the house's main heating. It benefits both you and the environment.

Which Contura are you?

Contura is available in a number of models and sizes. Common to all of them is a generous area of glass that shows a lot of the fire as well as Swedish design, quality and manufacturing.

How large an area can the stove heat? What does the area where the stove is to be located look like? There are different factors that determine the choice of the size of the firebox, the heating capacity as well as the size of the stove itself. The differences between the stove series are in the shape of the casing and the size of the firebox. Each series has different variants and different stove casings, so that you can choose the exact characteristics you want from your stove. In addition, there are accessories for different purposes, for example, heat retention and wood storage.

When you are clear about what suits your needs, the most important thing remains: To choose a stove that is easy on the eye and that will be a dear friend to the home for many years to come. We are sure that you will find a favourite.

How much of the fire do you want to see?

Many, many Contura owners appreciate their stoves for one special property: It shows a lot of the fire. Large front glass and generous side glass means that you can see the fire from (nearly) every angle. Look out for our symbol for flame visibility! It indicates how much of the fire the model shows.

Only front glass

large side glass

With a turntable the
fire can be seen 360°

How to choose your stove

When you have made the decision to purchase a stove it is important to think carefully about which model it should be.

Size first

Size is the most important choice – Contura has sizes ranging from the small stove for a cottage to majestic installations for large reception rooms, and everything in-between.

Measure the space where the stove is to stand and check the distances to flammable materials. Calculate the size of the area that the stove is to heat. Now you know what size you should be looking for. The dimensions and heating capacities are given alongside each model.

Choose design

Stoves from Contura are appreciated because they show so much of the fire. This makes the stoves easy to position, even in small spaces. Thanks to the large glass areas, in most models the flames can be seen from at least three sides.

The stoves are available in most shapes, round, angular, oval, tall, low, narrow or wide. Have a good look! We are sure that you will find the one you want.

Different materials

The material makes a up a large part of the stove's properties. The stoves heat up quickly and spread their heat only a few minutes after the fire has caught. When the fire has burned down it cools quite quickly.

The soapstone stoves have, as well as their natural good looks, the ability to retain heat over a long period. Heating up takes a little longer, but when the stone has been heated after a period of being lit the heat accumulates. When the fire burns low the stone is still very hot and it takes several hours to cool. The tiled stove gives the home a light, classical and homely style. Cast iron stoves are strongly robust. In our interpretation they also have a rugged modern style.

Personal style

With our accessories you can give the stove your own personal style and adapt it to your interests and needs.

You can, for example, choose the colour, a different top plate, door, log box, hotplate, fan, heat tank, damper, a connection to outdoor air, floor protector and much more. All accessories are made by Contura for Contura and fit the stoves perfectly.

Read more about accessories on page 140.

11 properties your fireplace needs

1. High flame visibility

Several of Contura's models have generous glass areas that display a lot of the fire. Our symbol for flame visibility indicates how much flame a particular model displays.

2. Cast iron door

In order to resist the stresses that arise with the large temperature variations, the door must be made from shape-retaining cast iron.

3. High level of efficiency

The efficiency is the relationship between the energy the stove gives off and the energy that is supplied in the form of logs. Contura fireplaces have an efficiency of up to 86 %.

4. Swedish made and guaranteed

Contura fireplaces are high quality Swedish products developed and manufactured by NIBE Stoves. With a five year stove body factory warranty and good service you can rest secure for the service life of the stove.

5. Clean Burning System

The combustion air is heated to extremely high temperatures and flushed out onto the inside of the glass, which prevents soot build-up. This ensures that the fire is always visible in the room.

6. Powerful convection

The cool room air is drawn into the stove from underneath, is heated and rises. Just a few minutes later the hot air flows out into the room.

7. Simple to use

Contura products are equipped with a single control for exact output regulation, which allows simple and precise combustion control. The door, grates and ash-pan are also easily accessible.

8. Ecodesign

Manufactured to the latest standards, all Contura stoves comply with Ecodesign 2022 regulations.

9. Flexible

Contura is available in a number of variants and models. You can install a completely new stove, integrate with the existing chimney breast or stove and most importantly find your own style.

10. Heat retention

For maximum efficiency in heating, it is possible to choose different heat retention properties for several of the Contura models.

11. Many options

Supplement with one or more options such as a powerstone heat tank, soapstone top or finned grille.

Contura 110

Easy to place, easy to love

The compact, free-standing Contura 110 can fit almost anywhere, in any home. But there is nothing small about the warmth and the impression it creates in a room. The Contura 110 is an efficient heat source for every kind of home, from houses to cottages. The compact format gives you almost limitless possibilities to create the fireplace that suits your home best.

New life to older fireplaces

Mantelpieces and fireplaces should be living parts of your home. But many homes have fireplaces that are no longer in use. Give it new life with Contura 110. Its compact, free-standing cast iron format fits easily in most mantelpieces, most often with little modification or construction work required. You will soon notice what was the intended purpose of your old fireplace – to spread warmth and joy to your home.

Log storage the way you want it

The log box enhances the aesthetic appeal and practicality of Contura 300 series stoves to suit your wishes and your home.

The log box comes in three sizes and can be placed underneath (Contura 330G) or at the side of the stove. If you prefer concealed rather than open log storage, you can order a drawer for the box.

Contura 500 Style Series

Stylish stove draws all eyes to the fire

Viewed through generous glass doors and sidelights, the fire is quite the eye-catcher in the room. The Contura 500 Style stoves are not only attractive, they're excellent at heating too, providing efficient combustion and multiple features that make it safer and simpler to keep a fire burning. They come in a choice of materials and designs, along with heat storage, a fan, hotplate, log store, floor protector and other accessories.

Contura 500 Style has an elegant, aesthetically-pleasing design. It is also brimming with smart features, many borrowed from the larger Contura 600 Style range. Automatic start, a booster and a quiet-slide ash pan are new features that you'll love. The Contura 500 Style has also been upgraded with a new cast-iron and glass door, a new combustion damper design and an improved mechanism for door stop in open position.

Energy classification	

Accessories: Extra heat tank with a convection damper, turntable, glass or metal floor protector and outside air connection.

Contura 590T Style 

The best heating and fire possible

The models in the Contura 590 Style series give lots of opportunities for personal choices. The basic stove is black painted sheet metal or with a soapstone surround. Then choose a turntable or heat tank, for example, for more functions.

Specifications

Output	3–7 kW
Nominal output	5 kW
Efficiency	80 %
Heats	up to 120 m ²
Height	1544 mm
Width	542 mm
Depth	463 mm
Weight	240 kg

Energy classification	

Accessories: Painted aluminum, glass or soapstone top, extra heat tank with a convection damper*, turntable, glass or metal floor protector and outside air connection. *Cannot be combined with a fan.

Popular design, even smarter on the inside

ASF Automatic Start Function

ASF is an innovative feature that automatically controls the air through the grate during kindling. It means the door can be shut while getting the fire started and the stove therefore becomes completely independent of room air. It feels safer not having to leave the stove door open while the fire gets going. It is also perfect for modern houses with negative pressure. The function is unique to Contura and is patent pending.

SSA Silent Sliding Ash Tray

Beauty in the smallest detail we say – and mean it. The re-engineered design and damping function of the Contura 500 Style's ash pan ensure it slides quietly and softly during emptying.

RBF Refueling Boost Function

The boost function lets you "save" embers that have nearly died. You just open the handle on the left, new oxygen flows in from below, blowing life into the embers to set the new wood alight. Before long you're once again enjoying the warmth of a beautiful fire.

Contura Connect

Smart. Simple.Connected.

We're entering a new digital era with Contura Connect as part of the smart and sustainable home. Contura Connect is as groundbreakingly innovative as it is simple to use. The stove automatically regulates the supply of air to ensure optimised, cleaner and more efficient combustion with minimal emissions. It works with an app that lets you control and monitor the fire from your mobile device. The stove automatically increases the air supply when lighting the fire and adding more logs – making it easier for the fire to take hold and giving you more time to relax together.

Contura Connect is part of the 500 Style range – Europe's most popular and appreciated range of wood burning stoves. Featuring an elegant, timeless aesthetic and compact size, it enhances and blends in with the design of the home.

Accessories: floor protector in glass or sheet metal, outside air connection.

Intelligent features

- **Easy ignition and burning**

The stove increases the airflow to boost the fire, both during ignition and when adding more wood. Getting a fire going and keeping it burning well has never been easier.

- **Automatic heat control**

Contura Connect features a lambda sensor that measures the amount of oxygen during combustion, and a thermometer that measures the stove and room temperatures, enabling it to control airflow and regulate the heat inside the stove. It can be regulated both manually and automatically.

- **Cleaner combustion, more attractive fire**

Contura Connect adjusts airflow which results in cleaner, more sustainable combustion, reduced emission levels and a more attractive fire with softer flames.

- **Notifications and reminders**

Contura Connect can send notifications to your phone when it is time to add more wood. It can let you know how much firewood is needed and when it is time to empty the ash pan.

- **Overheat protection**

An automatic overheat feature lowers the temperature inside the stove and sends a notification about what adjustments you can make to prevent it from overheating. The app contains information on how you can keep your stove burning well without it getting too hot.

- **Monitor and optimise how you use your stove**

The app displays statistics and data on how you use your stove over a period of time and how much it heats your home. Using this valuable information, you can optimise and control the heat in your home, ensuring that nothing goes to waste.

Control your comfort

Let your smart stove become the heart of your home! The Contura Connect app allows you to control your stove settings, from wherever you are. Letting you easily set the heat at the temperature you want your stove to maintain. From cool summer evenings to crisp winter days, you can create the perfect, comfortable temperature in your home all year.

The straightforward, user-friendly app combines smart features with the option to monitor how much heat energy is being emitted by the stove, helping you optimise the performance of your sustainable, energy-efficient home.

Contura 600 Style Series

Beauty from within, but seen on the outside

A fire is an eye catching centrepiece to a room. If there is the space and area, one should invest in a stove that stands out on its own, for the heat it provides but also for the design.

The stoves in the Contura 600 Style series have become better in every way: they heat better and have new and improved functions, such as autostart for fast lighting, silent ashbox and a boost function to awaken dying embers. But most of all they have been redesigned, with new surrounds, doors and colours.

As we all know, beauty comes from within, but it is also seen from the outside.

Specifications

Output	3–9 kW
Nominal output	6 kW
Efficiency	86 %
Heats	up to 150 m ²
Height	1260 mm
Width	540 mm

Energy classification	

Accessories

Top in painted aluminium, soapstone (black only) or glass, shelf or cover, log compartment or door, freestanding shaped log storage and heat retaining powerstone.

Contura 610G Style 

A new personal favourite

Contura 610 Style is the smallest model in the grown up 600 Style series. For example, you can choose a cast iron or glass door, surround in artstone or metal (black, grey or white), log compartment or door, front cover or warming shelf above the door and accessories such as a heat retaining powerstone, hotplate and fan. One attractive and practical new feature is log storage at the side of the stove.

Specifications

Output	3–9 kW
Nominal output	6 kW

Contura 610 Style

Contura 620 Style 

Heating for everyone

Contura 620 Style is equipped with heat retaining powerstone and a convection damper as standard. You can also select a further 20 kg powerstone for even better heat storage (with front cover option). This means that you get even more heat out of your logs because the heat is retained in the stone. The model has a cast iron door. Select with or without a door on the lower compartment.

Specifications

Output	3–9 kW
Nominal output	6 kW
Efficiency	86 %
Heats	up to 150 m ²
Height	1290 mm

Contura 690G Style 

With a lot of everything

The Contura 690 models give a majestic impression of a tiled stove with the advantages of a modern stove: it displays a proper fire high above the floor. This model has lots of everything: three different colours, three different tops, two different doors, two surrounds and several accessories. Regardless of your favourite variant, you will enjoy many hours of cosiness and pleasant heat each time you light a fire.

Specifications

Output	3–9 kW

Accessories: powerstone, fan. All models have a lower door (standard).

Contura 690T Style 

Extra heating with Soapstone

A larger stove has a greater output, that is, gives off more heat than a smaller one. There are also good ways of getting even more heat out of your stove. Soapstone is a naturally heat retaining material. With a soapstone surround the stove remains warm for several hours after the embers have died. The soapstone has unique natural veining, which means that no two stoves are the same.

Contura 800 Style Series

Compact. Capable.

The new Contura 800 Style features an updated, even more elegant design. But above all, added features for easier fire lighting and tending. An autostarter for fast fire lighting, a booster to revive embers, and a silently sliding ash pan are just some of the new features to add to the pleasure of a real fire.

With a wide range of models and add-on options, you can be sure of finding your ideal stove. A heat source for any interior and every personality.

.....

Contura 810 Style

Series base model

A compact stove for easy positioning in any interior. The base model in this range is available in grey, white and black, and the upgrade to Style now means that the door features an even taller glass pane for even better flame visibility. The chimney can be connected to the top or rear of the stove on all models.

Contura 820TG Style 

Striking contrast

With natural soapstone side panels and a stylish glass door, this stove combines two design worlds in a striking way. The soapstone has an individual veining that gives each stove a unique character. The glass door showcases the fire and reflects light. Adding a burst of vibrancy and life to your interior.

Contura 820T Style 

Natural soapstone

With panels in soapstone you'll have a beautiful, natural surround for your stove. Every soapstone fireplace will always be unique, as the veining of the natural stone is naturally variable. The naturally heat-retaining stone also provides comfortable and steady heating. A new feature in the Style upgrade is that the stone panels now have fewer joins as compared to previous models.

Contura 800 Style

Contura 900 Style

The best. And then some.

Contura 900 Style is the big brother of Contura 800 Style, one of our most popular and award-winning stove series. Contura 900 Style continues to build on the much-appreciated design and technology of Contura 800 Style, but adds much more. A larger format, new features and more generous glass panels. Discover Contura 900 Style, a new flagship in the Contura family.

Choose your design and colour

Contura 900 Style is available in several colours, materials and heights, allowing you to find your particular favourite. From classic black and crisp white, to soapstone where each stove has its own unique, natural veining. Contura 900 Style is also available with or without glass side panels.

900

Swedish craftsmanship in every detail

Contura stoves are developed, manufactured and assembled in Sweden. In our factory in Markaryd, each and every stove is carefully inspected to ensure the very highest quality. We combine advanced, cutting-edge technology and solid craftsmanship to create world-class stoves, adapted to modern homes and conditions.

BPF – Bypass Function

When opening the door on the Contura 900 Style, a bypass damper opens which captures the smoke and reduces the risk of it entering the room.

Contura 910 Style, black 

Uncompromising output

The Contura 910 Style is a powerhouse that fits perfectly wherever you want to place it. Despite its smaller size, it delivers impressive output and quickly creates a warm and cozy atmosphere in the room. The robust cast iron door enhances the classic impression that lasts year after year. A perfect stove for those who seek functionality and quality without compromising the feeling of real wood burning.

Specifications

Output	3–8 kW
Efficiency	85 %
Heats	up to 140 m ²

Accessories: Soft close door, floor protector, hotplate, outdoor air connection.

Contura 910G Style, white 

Efficient and compact

The Contura 910G Style shares the same efficient and compact format as our base model (Contura 910 Style) but replaces the classic cast iron door with an elegant glass door. The result? A beautiful view straight into the heart of the flames. This stove is an obvious choice for those who want both smart heating and a visual experience. You get not just warmth, but a lively light point that becomes a natural part of your home. *Also available in black.*

Energy classification	

Accessories: Soft close door, floor protector, hotplate, outdoor air connection.

Contura 920T Style, grey 

Smaller in size but big on function and comfort

Thanks to its surround made of natural soapstone, it has a unique ability to store heat and slowly release it over time, even after the fire has gone out. This makes the stove a perfect choice for those who want an even indoor temperature and lower wood consumption. The organic look of the soapstone also adds a warm, natural feel that fits any interior style. *Also available in black.*

Specifications

Output	3–8 kW
Efficiency	85 %

Contura 956 Style, black 

A fire experience

The side glass panels on the Contura 956 Style let the movement of the flames become part of the overall impression—from morning coffee at the dining table to evening relaxation on the sofa. The stove is built on the same compact frame as the other models in the 900 series and works equally well as a heat source and a visual mood setter. A perfect choice for those who want the presence of fire visible from all angles.

Contura 956T Style, grey 

No compromise

Design, panoramic view, and long-lasting heat, all in one. The Contura 956T Style is the stove for those who don't want to compromise. It combines the best of several worlds: side glass that shows the flames from multiple angles, and a soapstone surround that retains heat long after the fire has gone out. A stove for those who appreciate both design and efficient burning—without having to choose. *Also available in black.*

Contura 990 Style, black 

More of everything

The Contura 990 Style is the largest model in the series, and it shows. The powerful construction delivers both high performance and a stable presence in the room. It's a stove that both heats and impresses. Here you get traditional wood burning in a modern, sleek package. A true centerpiece with strength and character for those who want a substantial boost of both warmth and atmosphere.

Contura 990G Style, white 

The next level

Built on the same powerful frame as the 990 Style, but with a large glass door that elevates the experience to the next level. The Contura 990G Style is a stove that not only heats but also shows why you chose a wood-burning stove. The fire takes up space, both physically and visually, creating a living focal point in the room. An ideal model for those seeking something larger, with innovative design and majestic fire. *Also available in black.*

Contura 996T Style, grey 

Generous side glass and heat-retaining soapstone

The Contura 996T is a stove that provides efficient heating, long-lasting effect, and a grand visual expression. The fire becomes a natural part of the interior, and the heat remains long after the embers have faded—a uncompromising solution where form meets function in perfect harmony. *Also available in black.*

CONTURA

MYCUBE

The image shows a modern interior space with a dark wood modular stove system (Contura MyCube) integrated into a wall. Two windows with dark frames and light-colored curtains are visible. A red leather lounge chair with a tufted seat and backrest is positioned in front of the stove. A small potted plant sits on a side table to the left. The scene is lit with warm, ambient light, creating a cozy atmosphere.

New!

Make it yours.

Create freely with the Contura MyCube modular stove system.

Contura MyCube G – right, black with glass door 

Build from scratch

The first step in building your Contura MyCube system is to choose the stove cassette. We offer cassettes with glass on two or three sides. The Contura MyCube is also available in a wall-mounted version. You can choose between black and soapstone in all variants.

A capable heat source

The firebox in Contura MyCube is designed for a high level of efficiency. You can also choose to add heat-retaining Powerstone. One kit weighs 45 kg and fits in one top section – a total of 135 kg of Powerstone in three top sections. These allow the heat to be stored for a longer period of time, meaning the stove gives off heat long after the fire has burned out.

With Contura MyCube, you have a unique opportunity to create freely. The various accessories are easy to install and can be combined in just about any way you want. And as always with Contura, you are assured high build quality and sustainable materials.

Contura Cassettes

More heat and new life in your home

If you're building a new fireplace or wanting to get more out of your old one, a cassette stove is the perfect solution. A cassette heats your home, unlike an open fireplace which loses heat up the chimney. A closed fireplace also releases far fewer particles into the atmosphere.

Contura is manufactured with the latest technology, which means that it is very energy efficient. The fireplace is easy to light and reaches full output within a few minutes. All Contura products are thoroughly tested so that you can light with a clear conscience and a great deal of pleasure.

Contura cassettes are available with a choice of sizes, doors and designs. Find your favourite!

Contura Cassettes

Contura i1

A cassette that always finds room

The cast iron Contura i1 is available with 3-sided and 4-sided frames. It is compact and sturdy, with a clean, stylish design that feels at home in both modern and traditional homes. It is the perfect choice for everybody who wants the warm, cozy feeling and at the same time save space.

Upgrade your heating efficiency

Compared to an open fireplace, the Contura 110 and Contura i1 offer more efficient heating. An open fire usually draws more heat from a room than it adds. With Contura 110 and Contura i1 heat is emitted through the glass door. Your heat economy improves, with higher efficiency and more modern combustion technology.

Specifications

Output	4–7 kW
Nominal output	5 kW
Efficiency	80 %
Heats	up to 120 m ²

Sheet metal floor protection, outside air connection.

Contura i1
with 4-sided frame

Contura i1
with 3-sided frame

Contura i2

Create your cosy space

Do you have your own vision of what a fireplace should look like and feel like? Contura i2 is a fireplace cassette that gives you creative freedom in a practical format that is easy to place. Choose a glass door that amplifies the light from the fire, or a cast iron door for a substantial, more traditional impression. Contura i2 is available with either a three-sided or four-sided frame.

Upgrade your open fireplace

Contura i2 is not only a good choice for you who want to build something completely new. A cassette can also be used to upgrade existing fireplaces. An open fireplace can often draw more heat out of a room than it adds. With a fireplace cassette, a pleasant heat is spread through the glass. Your heating costs will be lower with higher efficiency and cleaner, more modern combustion technology.

Specifications

Output	4–7 kW
Nominal output	5 kW

*grey with glass door
and 3-sided frame*

Contura i5

Clean lines and large glass areas

Upgrading an open fireplace with an insert is a wise decision. The heat spreads through the room instead of disappearing up the chimney. With the efficient combustion technology in Contura i5, the logs last longer and soot is minimised so that the fire is always visible through large, clean glass.

Contura i5 with panorama door gives the fire a lot of space. Contura i5 with double doors is ideal for corner stoves where a larger door takes too much space. The modern impression is reinforced by the finned grille.

Contura i5L has additional cast iron legs for positioning in a fireplace recess and is available in black or grey and with panorama or double door configurations.

Specifications

Output	3–9 kW
Nominal output	5 kW

Contura Inserts

Think freely with inserts

Give your ideas free rein by choosing an insert from Contura. Browse the following pages for lots of inspiration. Inserts are available in a range of sizes and with surrounds in a choice of materials so that you can create your dream fireplace. You can also build your own fireplace for the insert.

Whichever insert you choose, you'll enjoy a superb fire that will brighten your home and fill it with luxuriant heat.

Build in heating!

A modern fireplace with generous glass gives you the sensations of the fire, at the same time that you use the energy to heat your home.

Contura is manufactured with the latest technology, which means that it is very energy efficient. The fireplace is easy to light and reaches full output within a few minutes. All Contura products are thoroughly tested so that you can light with a clear conscience and a great deal of pleasure.

Discover new possibilities with HR glass

HR (Heat Reflective) glass is a revolutionary new product that reflects heat back into the combustion chamber by up to 16 times more than normal glass. This means that more heat stays inside the stove, creating a more efficient burn, less soot on the glass and a more beautiful, cleaner fire.

A Contura stove with HR glass provides a more comfortable feel in modern, well-insulated homes and can be placed closer to furnishings.

Several of our stoves now feature HR glass.

Contura i41AA, anthracite 

Excellence in every detail

Contura i51, white 

Lights in an instant

The white metal Contura i51 has fast become a favourite. The state-of-the-art design looks good in any modern home, of course, but what makes the i51 a real winner is that it has been air leakage checked and takes all the combustion air from outside. Lighting the fire couldn't be easier and the heating is extremely efficient.

Specifications

Output	6–10 kW
Nominal output	8 kW
Efficiency, up to	80%
Weight	230–400 kg
Height	1650 mm
Depth	500 mm
Width	770 mm
Colour	Black, White
Wood length	50 cm
Energy classification	

Log Box (Optional)

Weight	50 / 60 kg
Height	500 mm
Depth	500 mm
Width	400 / 650 mm

Contura i51, black 

A log box for variation

With generous glass areas on three sides and a spacious firebox, Contura i51 is truly an insert for the modern home. The technology beneath the aesthetic hood is specially adapted for houses with modern heating technology that creates negative pressure.

Specifications

Output	6–10 kW
Nominal output	8 kW
Efficiency, up to	80%
Weight	230–400 kg
Height	1650 mm
Depth	500 mm
Width	770 mm

Energy classification	

Accessories: Easy-to-position black log box, outside air connection, heat retaining powerstone.

Give Contura a personal touch

You have probably realised that Contura's basic models satisfy most tastes. You may have found your own favourite. Now it is time to choose the options! Thanks to our ingenious, Smålander designs it is possible to make a completely personal Contura that meets your needs.

Contura has options for the economic minded: A fan that increases the efficiency.

Contura has options for the orderly: You can keep a lighter, kindling and gloves behind a door.

Contura has options for the aesthete: How do you want to top your Contura? With soapstone, steel plate, glass or cast iron?

Here you can read more about hotplates, the turntable & floor protection to make your Contura stove fit your home perfectly.

Heat can be used for many things

Several of our models can be supplemented with a fan that gives an extra kick to the heat. A hotplate or soapstone top is an energy saving complement to the usual hob and oven.

Options for comfort and function

Here is an overview of options that increase the benefits and pleasure of using your stove. Bear in mind that certain options cannot be combined on all models. The complete range of options can be found at www.contura.eu

Drawer. Convenient and spacious steel box placed under the stove (Contura 300 series only).

Cast iron hot plate. Perfect for when you want to use the stove to heat up food and drink.

Freestanding wood storage. Exclusive to Contura 600 Style series.

Freestanding log box. Available for Contura 300 series stoves. A steel log box can be placed under the Contura 330G or on the side of the Contura 310 and Contura 320. Placed horizontally holds logs up to 50 cm in length.

Fan. Distributes the heat quickly and provides a more even temperature. It is thermostat-controlled and starts when the fire is lit and stops when the fire has gone out. Easy to install and can also be retrofitted.

Glass top. Give your stove a modern look with a glass top. Suitable for Contura 500, 600 and 800 Style.

Painted Aluminum. For clean lines and a modern finish. Suitable for the Contura 500, 600 and 800 Style

Soapstone top. Each piece of soapstone is unique in its beautiful veining. The stone retains heat for a long time and also acts as a hotplate.

Turntable. Stepless rotation through 360 degrees. The turning angle and the speed of rotation are adjustable. Suitable for all Contura 500, 600 and 780, 880.

Soft-close door. Store logs, matches and protective gloves behind a matching, soft-closing door.

Floor protection. Our practical floor protectors are available in black or grey sheet metal or transparent, toughened glass. In addition to being attractive and protecting the floor they are easy to remove for cleaning.

Heat tank. The powerstone heat tank is concealed in the stove and retains the heat for a long time. In the models of the Contura 500, 600, 700 and 30 ranges the heat tank cannot be combined with the fan.

Log box. A practical compartment under the stove which keeps the logs in order is standard on several models.

Options for Contura Inserts and Cassettes

Bear in mind that certain options cannot be combined on all models. The complete range of options can be found at www.contura.eu

Elegant finned grille. Stove openings larger than the dimensions of the insert can be concealed by a matching finned grille. This is easy to cut to the perfect size and install.

Mesh grille. Stove openings larger than the dimensions of the insert can be concealed by a matching mesh grille. This is easy to cut to the perfect size and install.

Legs. Contura i5 can be supplemented with short legs.

Heat Tank. 200 kg Powerstone for Contura i31 and i41 and 100 kg Powerstone for Contura i51 if you want to retain heat for longer.

Log Box. A black painted steel log box is available for Contura i41, i51 and i61. You determine where and how it should be located. Strong enough to use as a bench or extra surface.

Product Information

Facts about all the stoves are gathered here, model by model so that you can plan your choice. Using the dimensions diagrams you can measure exactly how the fireplace can be positioned.

Safety tested

CE labelling is an important part of EU product legislation and includes construction products, machinery and toys. The CE label certifies that the product meets the most important characteristic, namely, safety.

All products made by Contura are CE labelled.

Up to 10-year warranty!

When you buy a complete stove from Contura you always get a five-year stove body factory warranty. Good service and parts availability are additional assurances during the service life of the stove.

Register your stove and receive 10-years warranty.

Dimension diagrams

Detailed dimensions diagrams for all Contura stoves are here so that you can plan positioning and installation.

110

130

210 / 210G

* To prevent discolouration of painted non-flammable walls we recommend that the same side distance as to combustible walls is used.

Note: If the stove is positioned on a turntable the stated installation distances do not apply.

Note: The glass hearth plate increases the distance above the floor by approximately 10 mm.

210 / 210G with legs

A = height from floor to chimney connection
 B = height from floor to C/c smoke outlet rear.
 C = distance from back to c/c air inlet
 D = distance from back to rear smoke outlet

Note: The glass hearth plate increases the distance above the floor by approximately 10 mm.

Maximise the heat with your Contura

The heat tank and hot air damper offer excellent solutions that give more heat for longer.

Heat tank with Powerstone

Powerstone is a stone with excellent heat retention properties. It provides heat long after the fire has gone out.

The heat tank is available for Contura 590T Style, 596 Style, 596T Style, 600 Style series, 890 Style, 896 Style, i41, i51, and i61 models.

Adjustable damper

The adjustable damper in some Contura models enables you to regulate the amount of heated air from the stove. Adjustable damper is provided with Contura Style models 590T, 596, 596T, 620, 690, 690AG and 690T. A closed damper gives a long cooling down period. An open damper distributes the heat more quickly, which is good when you want to heat a room up quickly.

Dual air system regulates heating and cooling

With two efficient heating systems most Contura stoves have a fantastic ability to both control the heat distribution and the cooling down period. The red arrows indicate how cold air is drawn into the rear of the stove, continues through two pipes in the firebox, passes through metal hoses and is distributed into the room at the top of the front side of the stove.

Contura 500 Style with heat tank

Powerstone heat tank

Several models in the Contura series are available with a heat tank made of heat retaining powerstone. The tank is located under the cover above the firebox of the stove. The excellent heat retaining properties of the stone give up to four hours longer heat retention.

Contura 600 Style with heat tank

The tests of the models with a heat storage compartment in the 600 range comprised one kindling and four stokings. The combustion damper was fully open during the kindling and the first three stokings. After the last stoking, the air supply was reduced to just less than half. The cooling-down time is calculated from the last stoking until the outer temperature of the heat storage compartment (measured on the cover) has fallen to 30°. The tests were performed six times on six different days.

Contura i41 and i51 with heat tank

At Contura, we care about testing function and efficiency. The curves show the heat up of the stone cladding (upper front) as well as the power stone

during six hours of firing. They also show how long it takes until the temperature has dropped to 30°.

The importance of wood

Wood is a biofuel that, when correctly lit, is part of the natural cycle. As a tree grows, it consumes water and carbon dioxide in photosynthesis. This process releases oxygen, which we need to breathe. When the wood is burnt or decomposes it releases the water and the carbon dioxide. The oxygen that is created when the tree grew is also consumed in the process. All this takes place in a cycle, which means that burning wood does not contribute to the greenhouse effect.

Logs are best stored in a woodshed with good air circulation. It is important that the wood does not lie on the ground and that it is as airy as possible at the roof and sides. Logs that have been split early in the spring can in the best case be used the following winter. But it is better if the wood can dry for two spring seasons because wood dries best in the spring before the leaves bloom. Damp wood burns poorly, gives off less heat and is worse for the environment. Logs to be burnt should not contain more than 20% moisture content. Kiln dried logs and those branded 'ready to burn' are guaranteed to fulfil this requirement.

Split logs dry quicker than unsplit. Birch logs must be split as quickly as possible, otherwise they become hard and difficult to work with. Pine and fir trees are easier to split if they have been allowed to dry a little. The logs should be stored at room temperature for 24 hours before burning.

Covering the logs with a tarpaulin for example is not a good idea because the moisture from the ground and the wood cannot then evaporate. Damp wood is more susceptible to rot, which quickly consumes the energy value of the wood.

Never burn painted wood, impregnated timber, plywood or similar. It can damage the fireplace and the environment. Oak logs are excellent for burning but it is important to mix them with other wood when burning. Oak contains a lot of energy, but also a lot of tannin which is aggressive to both the stove and masonry.

Light green for a better environment

Making the stove responsible for part of your heating costs is wise from both an environmental and financial point of view. If you light correctly it is a cheap heating method and kind to the environment. Cosiness is included in the price!

Modern wood firing technology is an environmentally friendly energy form, which does not contribute to the greenhouse effect. Complete combustion of wood produces carbon dioxide, water vapour and ash that can be used as garden fertiliser. Complete combustion also gives better heating economy, which is itself environmentally friendly. But in order for the fire to have the best possible effect and contribute to as clean an environment as possible, it is important to fire correctly. Here are some basic tips. See the instruction films and read more at contura.eu

Six hot tips for greener and more efficient firing

1. Replace your old stove with a new one if it is more than ten years old. Modern stoves are up to 90% cleaner and 40% more efficient than their predecessors.
2. Always light using dry wood.
3. Always operate the stove with a good firebox temperature to ensure complete and clean combustion.
4. Make sure that the fire always has enough oxygen.
5. Do not burn more than the manufacturer recommends, which is normally a max 2–3 kg logs/hour.
6. Always let the wood lie indoors for at least one day before burning. "Deep frozen" wood (–20 degrees) means that the heat recovery will be very poor.

Completely Swedish.

The design and development of Contura stoves takes place in Sweden, as does the assembly of all stove parts. The products are quality controlled before leaving the factory in Markaryd. This gives us full control over the quality in all stages of production. We take care to ensure that Contura products are suitable for the modern home and conditions. We are proud to mark our products Made in Sweden!

A Smålander that heats Europe

Contura stoves are made by NIBE in Markaryd, in Småland. Conserving resources has always been a matter of course in Småland and that is why our manufacturing is modern, lean and efficient. Quality permeates every level of production in our factory, which is the largest and most modern facility for the manufacture of stoves in Europe. Our products are sold throughout Europe and are appreciated for their timeless design, efficiency and high quality.
