Cubic  
comfort

Contura 300  
Contura i7

## Greater variation with Contura 300 and i7

Is it time to up the comfort factor? Then take a look at the Contura 300 stove and i7 cassette. You'll discover almost endless variations for building the stove or cassette exactly as you want it. What's more, there's space for logs that are half a metre long. We call it cubic comfort.

Contura stoves are protected by registered design rights so you can be certain of unique design and performance.

1. Design and performance from the inside out.
2. Large firebox with room for logs up to 50 cm long.
3. You decide which side to place the practical free-standing log box (option).
4. Wide-screen glass for maximum view of the fire.
5. Contura softshell handle.
6. Practical drawer (optional) also fits the Medium log box.

CONTURA C310G, WHITE

## If you enjoy piecing things together, then this is the stove for you

The Contura 300 is the perfect choice if you know how you want your stove to look. Do you want it to be black or white? With a soapstone or artstone surround? A cast-iron or glass door? What about log storage? You have a choice of three log boxes. There's also a drawer and other smart accessories.

### Artstone and soapstone radiate heat longer

Natural artstone or soapstone surrounds give the C300 series an even more exclusive look. The stone also plays an important role in storing heat and maintaining the temperature for a longer period of time.

CONTURA I7

## Build in with variation

The Contura i7 is the cassette model of the series. The i7 allows you to customise your fireplace exactly as you want it. Place it inside a fireplace that you design yourself or, as illustrated, create your own unique solution. The Contura i7 is black and available with a glass or cast-iron door and steel frame.

Output	7 kW
Efficiency	75%
Heats	up to 120 m <sup>2</sup>
Weight	100 kg
Max. log length	50 cm

## Log storage the way you want it

You can choose a matching log box to go with the Contura 330. The box enhances the aesthetic appeal and practicality of the stove which you put together to suit your wishes and your home.

### Mix and match

The log box comes in three sizes and can be placed underneath or at the side of the stove. If you prefer concealed rather than open log storage, you can order a drawer for the box.

Small  
W 570 x H 375 x D 375 mm

Medium  
W 750 x H 375 x D 375 mm

Large  
W 375 x H 850 x D 375 mm

Contura 330

\*The stove in the illustration has a fire-rated constructional hearth.  
**Important!**  
Installation instructions concerning distance from combustible material must always be followed.

# Pick your favourite and personalise it with accessories

There are many variations of the models in the Contura 300 series and the i7 cassettes. Pick your favourite and combine it with one or more of the specially designed, practical accessories.

Free-standing stoves in the Contura 300 series

C310 – Cast iron door, Black metal

C310G – Glass door, Black metal

C310G White – Glass door, White metal

C320T – Cast iron door, Soapstone

C320TG – Glass door, Soapstone

C320A – Cast iron door, Artstone natural

C320AG – Glass door, Artstone natural

## Cassette Contura i7 – Black

Ci7 – Cast iron door with metal frame

Ci7G – Glass door with metal frame

C330G – Glass door, Low black metal

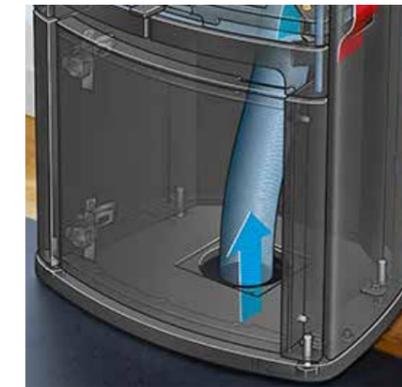

**The log box** made of black metal can be placed underneath the C330 or at the side of the C310 and C320. When it's underneath, the box takes logs of up to 50 cm in length.

**Hotplate.** A hotplate adds another useful feature to your stove.

**Drawer.** Practical, spacious drawer to place underneath the stove or inside a Medium log box. Black metal only.

**Supply air connection.** Draws air in from the outside. Suitable for modern homes with a ventilation system and negative indoor air pressure.

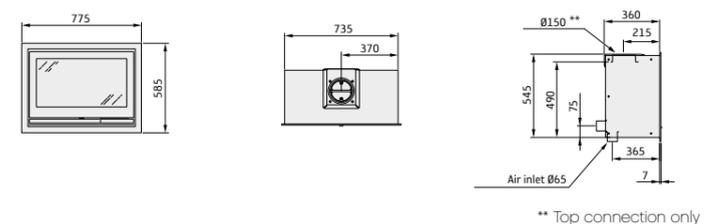

**Black glass hearth plate.** The glass adds modern and elegant style to the stove.

Output	7 kW
Efficiency	75%
Heats	up to 120 m <sup>2</sup>
Weight	
Ci7	100 kg
C310	130 kg
C320A	175 kg
C320T	190 kg
C330	115 kg

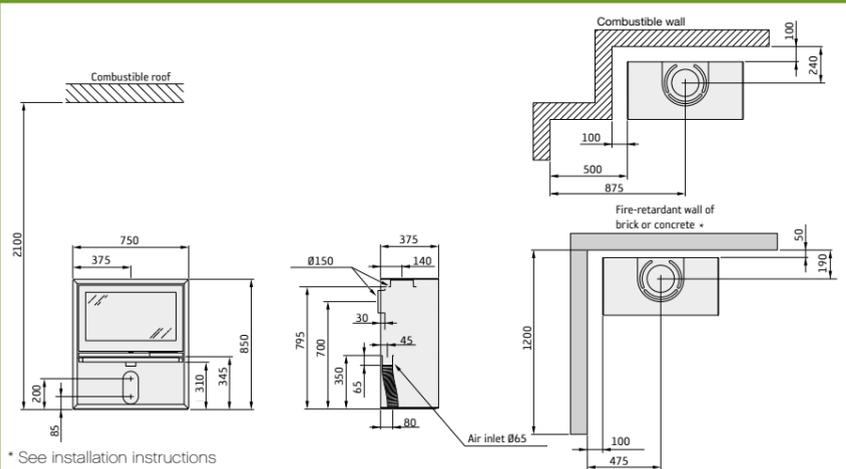

## Position and install your stove correctly

The stove must be placed at the correct distance from combustible walls for safety reasons. These diagrams show the dimensions. Don't hesitate to contact your local dealer who can give you advice and also recommend a qualified professional to help with the installation.

## Save money, buy a new stove

Do you have an old stove or fireplace in your home? If so, there are several good reasons for buying a new one. Just like cars, fridges and washing machines, stoves are becoming more energy efficient too. Modern stoves and inserts emit 50 percent less carbon dioxide and particles than old ones\*. They also achieve a higher efficiency, which means you get more heat for less wood.

**Modern stoves are more environmentally-friendly. A new stove...**

- ...reduces greenhouse gas emissions by up to 80 percent\*
- ...reduces wood consumption by up to 50 percent\*
- ...is climate neutral
- ...displays more of the fire.
