**Type approved in accordance with:**  
European standard EN-13240  
Swedish environmental marking  
NS 3059 (Norway)  
BImSchV.2 (Germany)  
Art. 15a B-VG (Austria)  
Clean Air Act. (UK)

### The stove becomes very hot

During operation, certain surfaces of the stove become very hot and can cause burn injury if touched. Be aware of the strong heat radiated through the hatch glass. Placing flammable material closer than the safe distance indicated may cause a fire. Pyre lighting can cause quick gas ignition with the risk of damage to property and personal injury.

### Installation by authorised technician

This manual contains instructions about how the stoves must be assembled and installed. To ensure the function and safety of the stove, we recommend that the installation is carried out by an authorised technician. Contact one of our dealers who can recommend suitable technicians.

### Building application

These main instructions may give guidance which would contravene national building regulations. Please refer to supplementary instructions or ask your local authority for advice regarding building regulations. Before installing a stove or erecting a chimney it is necessary for you to make a building application permission to your local authority. The owner of the house is personally responsible for ensuring compliance with the mandatory safety requirements and must have the installation approved by a qualified inspector. Your local chimney sweep must also be informed about the installation as this will affect the routines for regular chimney-sweeping services.

### Structural support

Check that the wood joists are strong enough to bear the weight of the stove and chimney. The stove and chimney can usually be placed on a normal wooden joist in a single occupancy house if the total weight does not exceed 400 kg.

### Hearth plate

Due to the risk of falling embers, a flammable floor must be protected by a hearth plate. It must extend 300 mm in front of the stove and 100 mm on each side of the stove, or have a 200 mm extension on each side of the opening. The hearth plate can consist of natural stone, concrete, metal plate or glass. A painted metal or glass hearth plate is available as an accessory for these models.

### Final inspection of the installation

It is extremely important that the installation is inspected by an authorised chimney sweep before the stove is used. Also read the "Lighting instructions", before lighting for the first time.

## Connection to chimney

- The stove must be connected to chimneys dimensioned for a minimum flue gas temperature of 400°C.
- The external diameter of the connection sleeve is 150 mm.
- Normal chimney draw under nominal operation should be between 20-25 Pa close to the connector. The draft is affected both by the length and area of the chimney, and by how well sealed it is. Minimum recommended chimney length is 3.5 m and suitable cross section area is 150-200 cm<sup>2</sup> (140-160 mm in diameter).
- A flue with sharp bends and horizontal routing reduces the draught in the chimney. Maximum horizontal flue is 1 m, on the condition that the vertical flue length is at least 5 m.
- It must be possible to sweep the full length of the flue and the soot hatches must be easily accessible.
- Carefully check that the chimney is sealed and that there is no leakage around soot hatches and flue connections. See page 31.

## Supply of combustion air

When a stove is installed in a room, the demand for air supply to the room increases. Air can be provided indirectly via a vent in the outer wall or via a duct from the outside that is connected to the connector on the underneath of the stove. The amount of air needed for combustion is 15 m<sup>3</sup>/h.

The connector for the combustion air has an external diameter of 67 mm. When duct routing further than 1 m the pipe diameter must be increased to 100 mm and a correspondingly larger wall vent must be selected.

In hot areas, the duct should be insulated with 30 mm mineral wool with a moisture inhibiting outer cover. It is also important to seal around the hole in the wall (or floor) of the lead-in using sealant.

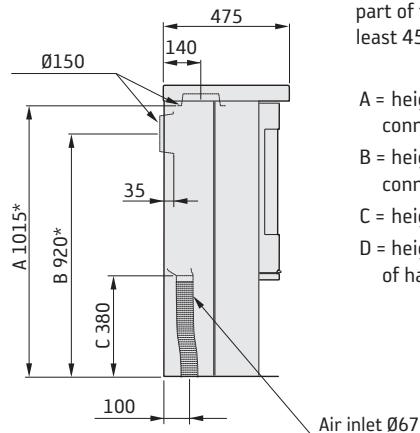

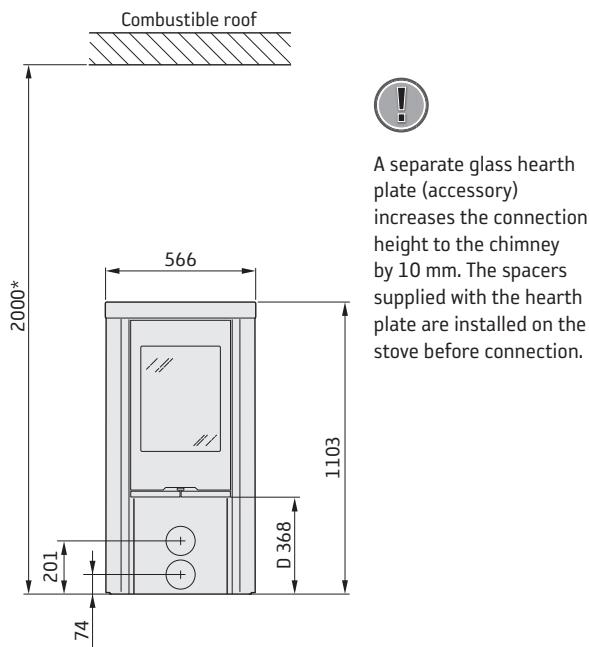

A 1 m length of condensation insulated ducting for combustion air is available as an accessory. See page 33.

## Installation distances

### C520T / C520S

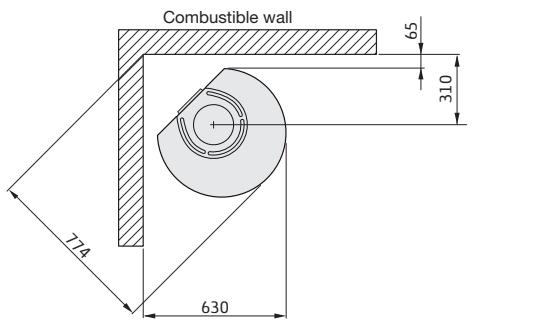

**WHEN INSTALLING TURNTABLE (OPTION)** the following installation distances do not apply.  
See the separate turntable installation instructions.

The minimum distance in front of the stove opening to combustible parts of the building or interior decoration must be at least 1 m.

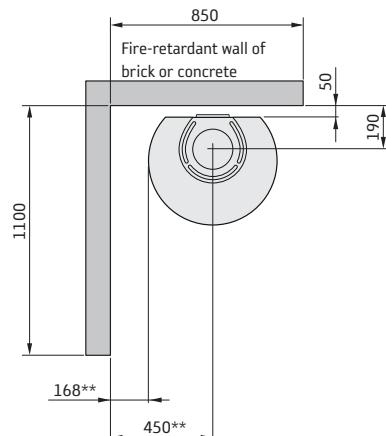

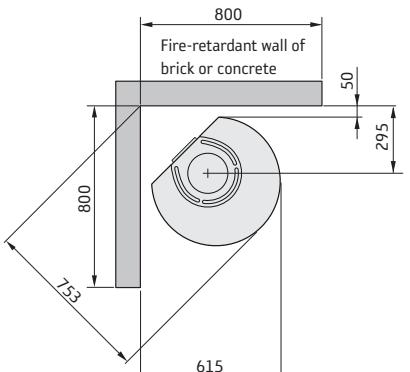

A = height from floor to chimney connection upwards  
B = height from floor to c/c chimney connection rear  
C = height from floor to air inlet  
D = height from floor to lower edge of hatch

#### INSTALLATION AGAINST COMBUSTIBLE WALLS

#### INSTALLATION AGAINST FIREWALLS

\* If the stove is placed on a hearth plate made of glass for example (accessory), the height from the floor is affected by a distance corresponding to the thickness of the hearth plate, for a free standing glass hearth plate this is 10 mm.

\*\* To prevent discolouration of painted non-flammable walls we recommend that the same side distance as to combustible walls is used.

Declaration of performance according  
to Regulation (EU) 305/2011  
No. C520T-CPR-130601-SE-2

# Contura

## PRODUCT

Product type	Stove lit with solid biofuels
Type designation	Contura 520T
Manufacturing number	See rating plate on the stove
Intended area of use	Heating of rooms in residential buildings
Fuel	Wood

## MANUFACTURER

Name	NIBE AB / Contura
Address	Box 134, Skulptörvägen 10 SE-285 23 Markaryd, Sweden

## CHECKS

According to AVCP	System 3
European standard	EN 13240:2001 / A2:2004
Test institute	Rein-Ruhr Feuerstätten Prüfstelle, NB 1625, has checked declared performance and issued test report no. RRF-40 15 3859

## DECLARED PERFORMANCE

Essential characteristics	Performance	Harmonised technical specification
Reaction to fire	NPD	
Minimum distance to combustible material	Rear: 100 mm Side: 468 mm Other safety distances according to the installation instructions	
Risk of falling embers	Pass	EN 13240:2001 / A2:2004
Emissions from combustion	CO 0,09 %	
Surface temperatures	Pass	
Cleaning options	Pass	
Mechanical durability	Pass	
Emissions of hazardous substances	Pass	
Nominal output	5 kW	
Efficiency	80 %	
Flue gas temperature in connector at nominal output	299°C	

The undersigned is responsible for the manufacture and conformity with the declared performance.

Niklas Gunnarsson, Business area manager NIBE STOVES  
Markaryd, March 17, 2015

## SE Montering

Om insatsen behöver läggas ned för att förflyttas bör lösa delar demonteras. Demontering av eldstadsbeklädnad beskrivs i slutet av denna anvisning.

- 1 Brasbegränsare
- 2 Rosttallrik
- 3 Varmluftsgaller
- 4 Eldstadsbeklädnad (Vermiculit)
- 5 Typskylt

## FR Avant de procéder au montage

Les éléments non fixés devront être déposés si l'insert doit être couché pour être déplacé. Le démontage de l'habillage du foyer est décrite à la fin de ce document.

- 1 Grille de retenue
- 2 Grille
- 3 Grille air chaud
- 4 Habillage du foyer (Vermiculite)
- 5 Plaque signalétique

## FI Ennen asennusta

Jos tulipesä pitää siirtää kyljellään, irtosat pitää irrottaa. Tulipesän verhoilun irrotus kuvataan ohjeen lopussa.

- 1 Suojareunus
- 2 Arina
- 3 Lämmminilmari
- 4 Tulipesän verhos (vermikuliitti)
- 5 Typpikilpi

## DE Vor der Montage

Wenn der Einsatz in liegender Position versetzt werden muss, sind lose Komponenten zu demontieren. Die Demontage der Brennraumauskleidung wird am Ende dieser Anleitung beschrieben.

- 1 Stehrost
- 2 Rostteller
- 3 Warmluftgitter
- 4 Feuerstättenauskleidung (Vermiculit)
- 5 Typenschild

## GB Prior to installation

If the insert needs to be put down to be moved, loose components should be removed. Removal of the hearth cladding is described at the end of these installation instructions.

- 1 Fire bars
- 2 Grate disc
- 3 Hot air grate
- 4 Fire bricks (Vermiculite)
- 5 Type plate

## NO Før montering

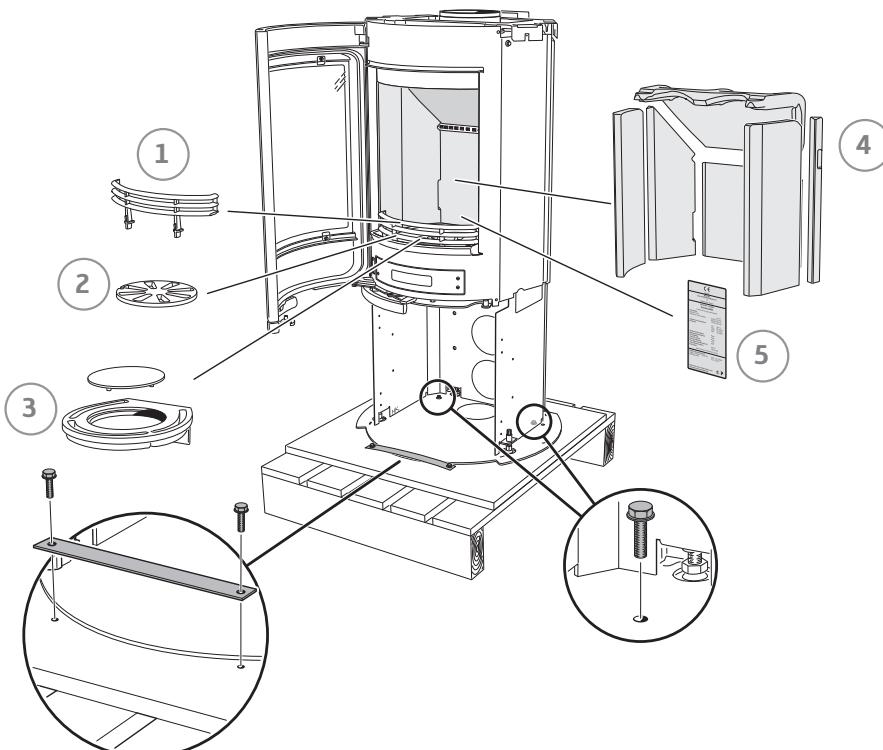

Hvis innsatsen må legges ned for å flyttes, bør løse deler demonteres. Demontering av brennplater og hvelv er beskrevet mot slutten av denne veilederingen.

- 1 Kubbestopper
- 2 Rist
- 3 Varmluftsgitter
- 4 Brennplater og hvelv (Vermikulitt)
- 5 Typeskilt

## DK Før opstilling

Hvis indsatsen skal lægges ned for at blive flyttet, bør løsde afmonteres. Afmontering af ovnbeklædning beskrives i slutningen af denne vejledning.

- 1 Brændeholder
- 2 Rund askerist
- 3 Varmluftsgitter
- 4 Ovnbeklædning (Vermiculite)
- 5 Typeskilt

## IT Prima del montaggio

Se è necessario smontare l'inserto per spostarlo, rimuovere prima i componenti liberi. La procedura di smontaggio del rivestimento del focolare è descritta alla fine delle presenti istruzioni.

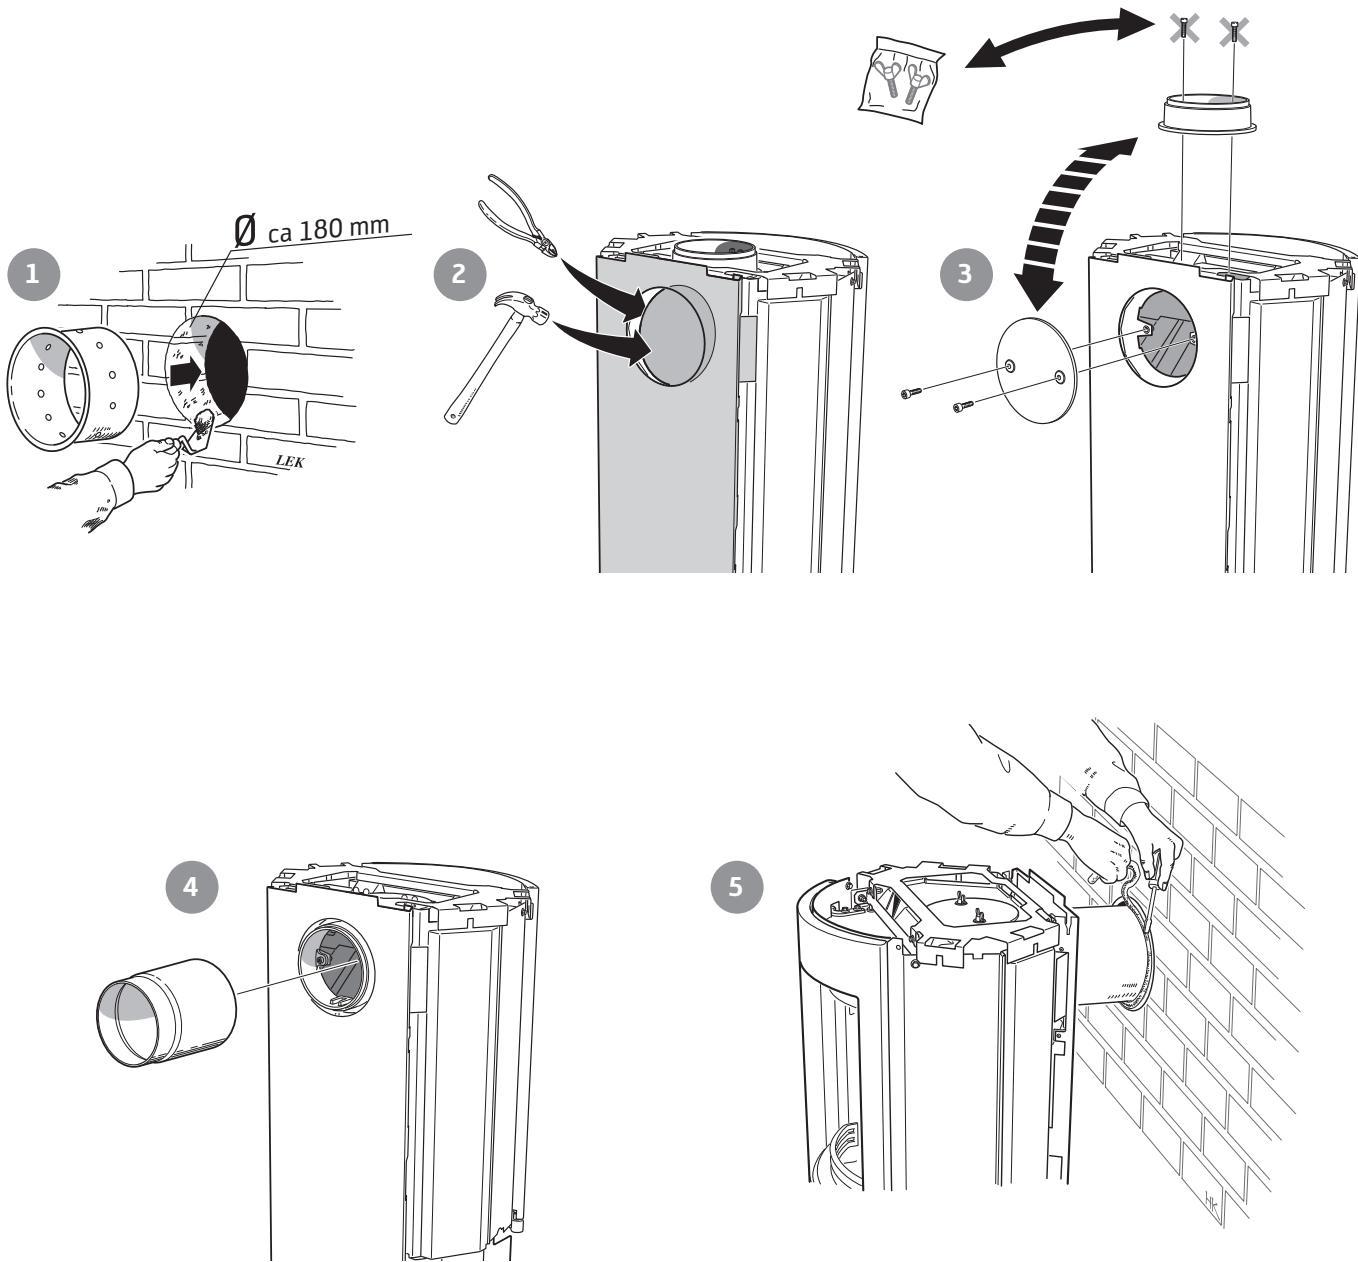

- 1 Griglia ferma-legna
- 2 Griglia del bracciere
- 3 Griglia di ventilazione
- 4 Rivestimento interno del focolare (vermiculite)
- 5 Targhetta identificativa

## NL Voorafgaand aan montage

Als de inzet liggend moet worden verplaatst, moeten losse onderdelen worden gedemonteerd. De demontage van de haardbekleding wordt beschreven aan het eind van deze instructies.

- 1 Houtvanger
- 2 Roosterschijf
- 3 Heteluchtrooster
- 4 Haardbekleding (vermiculiet)
- 5 Typeplaatje

- SE** Bakåtanslutning till murad skorsten
- DE** Rückseitiger Anschluss an einen gemauerten Schornstein
- NO** Bakmontering til murt skorstein
- FR** Raccordement par l'arrière à une cheminée de maçonnerie
- GB** Rear connection to a masonry chimney

- IT** Collegamento alla canna fumaria in muratura dal retro della stufa
- NL** Achterwaartse aansluiting op een gemetselde schoorsteen

**SE** Toppanslutning till skorsten  
Varmluftsgallret måste vara monterat innan skorstenen toppansluts.

**DE** Oberseitiger Anschluss an den Schornstein  
Das Warmluftgitter muss montiert sein, bevor ein Schornsteinanschluss an der Oberseite erfolgt.

**NO** Toppmontering til skorstein  
Varmluftsgitteret må være montert før skorsteinen topptilkobles.

**FR** Raccordement par le haut  
Monter la grille d'air chaud avant le raccordement à la cheminée par le haut.

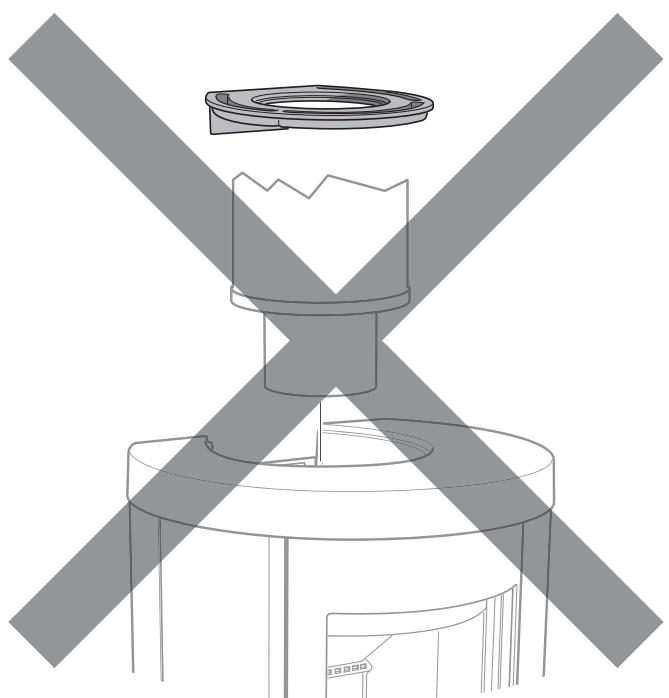

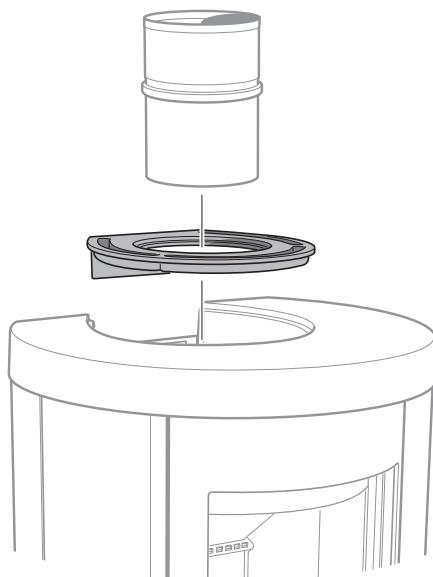

**GB** Top connection to the chimney  
The hot air grille must be installed before chimney top connection.

**DK** Toptilslutning til skorsten  
Varmluftristen skal være monteret, før skorstenen toptilsluttes.

**FI** Liitää ylöspäin savupiippuun  
Lämmönimariilia pitää asentaa ennen savupiipun liitintää ylöspäin.

**IT** Collegamento alla canna fumaria dal piano della stufa  
Prima di collegare la canna fumaria al piano della stufa, assicurarsi che la griglia dell'aria calda sia montata.

**NL** Bovenafsluiting op een schoorsteen  
Het heteluchtrooster moet zijn gemonteerd, voordat de schoorsteen op de bovenafsluiting wordt aangesloten.

**SE** Tilluft

**DE** Zuluft

**NO** Tilluft

**FR** Arrivée d'air

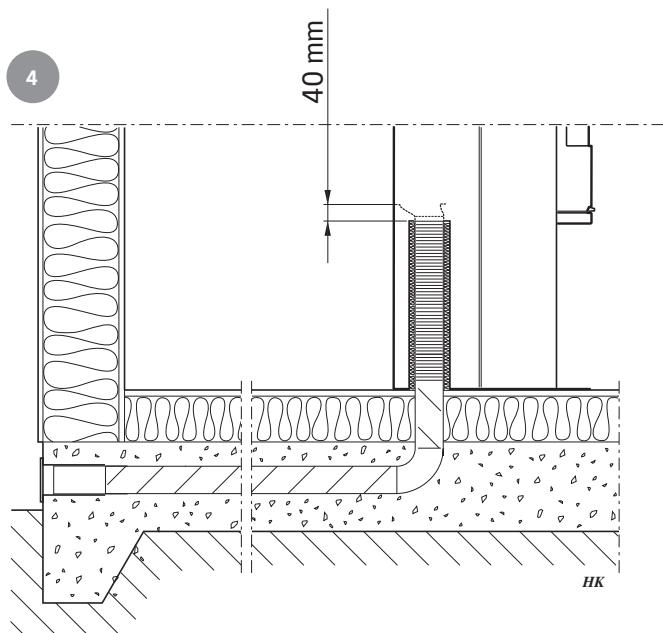

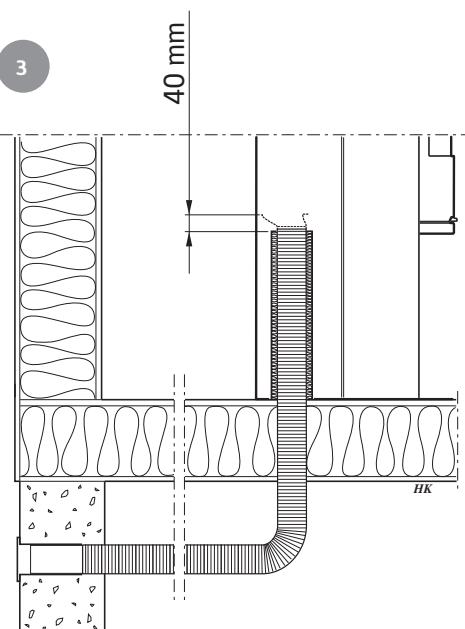

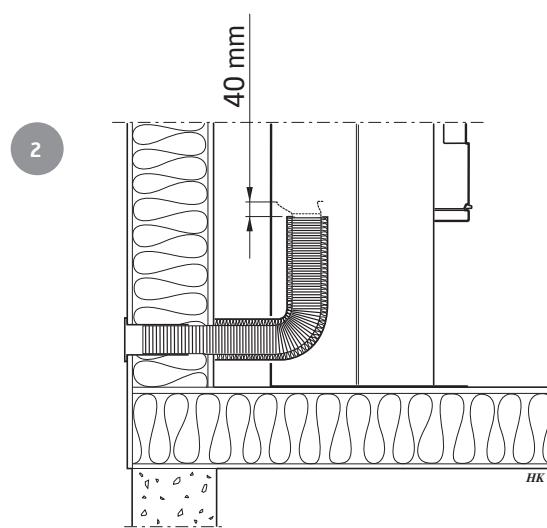

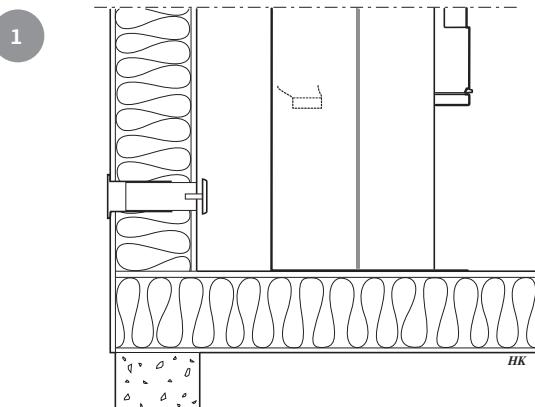

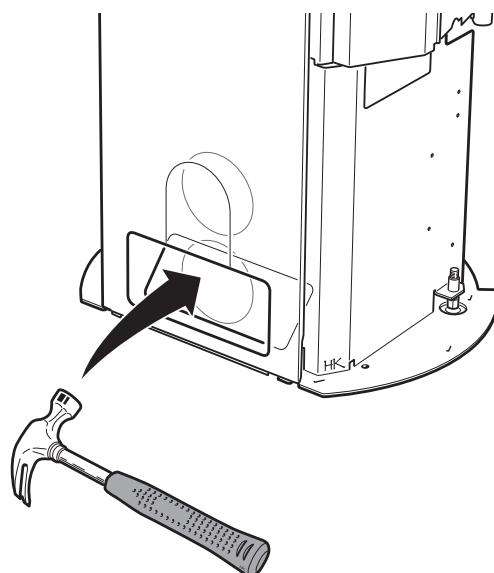

**GB** Supply
